

Pickleball balls are designed for different playing conditions.

Using the right ball improves your control, shot quality, and overall experience.

INDOOR vs OUTDOOR BALLS

INDOOR BALLS

Best for: Gyms & indoor courts

Softer plastic
Less bounce,
more control

Lighter weight
Easier on
paddles

Quieter play
Less noise
indoors

Designed for
consistent
indoor temps

Best for:

- School gyms
- Recreation centers
- Indoor pickleball facilities

OUTDOOR BALLS

Best for: Outdoor courts

Harder plastic
More bounce,
built for speed

Resists wind
Handles wind
better

More durable
Built to last on
rough surfaces

Withstands
heat, cold, and
sun exposure

Best for:

- Outdoor courts
- Windy conditions
- All-weather play

NUMBER OF HOLES: KEY DIFFERENCE

INDOOR BALL 26 LARGER HOLES

- 26 precision-drilled holes
- Larger holes for better air flow indoors
- Softer feel and slower pace
- Easier to control

OUTDOOR BALL 40 SMALLER HOLES

- 40 precision-drilled holes
- Smaller holes for better wind performance
- Faster pace and more pop
- More durable

QUICK TIP: Easy way to tell!

Indoor = 26 Large Holes | Outdoor = 40 Small Holes

INDOOR vs OUTDOOR BALL COMPARISON

FEATURE	INDOOR BALLS	OUTDOOR BALLS
NUMBER OF HOLES	26 (Larger holes)	40 (Smaller holes)
PLASTIC	Softer More flexible	Harder More rigid
WEIGHT	Lighter (-0.78 - 0.84 oz)	Heavier (-0.88 - 0.94 oz)
BOUNCE	Lower bounce More control	Higher bounce More speed
WIND RESISTANCE	Not designed for wind	Designed to handle wind
NOISE LEVEL	Quieter	Louder
BEST TEMPERATURE	60°F - 80°F (15°C - 27°C)	20°F - 110°F (-6°C - 43°C)

SPECIALTY BALLS

LOW BOUNCE BALLS

Best for:
Beginners & drills

Lower bounce helps
new players control
and keep rallies
going longer.

QUIET BALLS

Best for:
Noise-sensitive areas

Designed to
reduce noise.
Perfect for early
morning, late
night, and residential areas.

TRAINING / DRILL BALLS

Best for:
Practice & coaching

Highly visible
colors help for
drills, tracking,
and speed
development.

GLOW BALLS

Best for:
Night play

Lights up under
LED / UV light.
Great for fun
night games!

BALL CARE TIPS

- ✓ Keep balls clean. Wipe with a damp cloth regularly.
- ✓ Store in a cool, dry place away from direct sunlight.
- ✓ Avoid leaving balls in hot cars or freezing temperatures.
- ✓ Replace balls when they crack, split, or lose bounce.
- ✓ Good balls = better play!

PRO TIP

Using the right ball for the right environment helps you play your best, protect your equipment, and enjoy the game even more!

A7

Pickleball balls are designed for different environments.
Using the right ball improves your control, shot quality, and overall experience.

INDOOR BALLS

- Softer plastic
Less bounce,
more control
- 26 LARGE HOLES**
Better air flow
for indoor play
- Lighter weight
(~0.78 – 0.84 oz)
- Lower bounce
Slower pace
- Quieter play
Ideal for gyms
and indoor courts

BEST FOR:

Gymnasiums, indoor courts,
recreation centers, and school facilities.

OUTDOOR BALLS

- Harder plastic
More bounce,
built for speed
- 40 SMALLER HOLES**
Reduces wind
effect and adds
durability
- Heavier weight
(~0.88 – 0.94 oz)
- Higher bounce
Faster pace
- Built for wind
and tough
outdoor conditions

BEST FOR:

Outdoor courts, windy conditions,
asphalt & concrete surfaces.

QUICK COMPARISON

FEATURE	INDOOR BALLS	OUTDOOR BALLS
NUMBER OF HOLES	26 (Larger holes)	40 (Smaller holes)
PLASTIC	Softer More flexible	Harder More rigid
WEIGHT	Lighter (~0.78 – 0.84 oz)	Heavier (~0.88 – 0.94 oz)
BOUNCE	Lower bounce More control	Higher bounce More speed
WIND RESISTANCE	Not designed for wind	Designed to handle wind
NOISE LEVEL	Quieter	Louder
BEST TEMPERATURE	60°F – 80°F (15°C – 27°C)	20°F – 110°F (-6°C – 43°C)
BEST SURFACE	Indoor gym floors Wood, sport courts	Outdoor hard courts Asphalt, concrete

UNDERSTANDING THE DIFFERENCE

INDOOR PLAY

Slower pace, more control,
better for learning and
developing touch.

OUTDOOR PLAY

Faster pace, more speed,
built for wind and rough
outdoor surfaces.

HOW TO TELL THEM APART

INDOOR BALL 26 Large Holes

Larger holes =
more air flow

OUTDOOR BALL 40 Smaller Holes

Smaller holes =
more durability

PRO TIP

Using an indoor ball outside
will wear it out quickly
and affect performance.

Using an outdoor ball
indoors can be too fast
and harder to control.

Use the right ball for
the best experience!

APPENDIX A7 PICKLEBALL BALL TYPES

KNOW YOUR BALL. PLAY BETTER.

Pickleball balls are designed for different playing conditions.
Using the right ball improves your control, shot quality, and overall experience.

INDOOR vs OUTDOOR BALLS

INDOOR BALLS

Best for: Gyms & indoor courts

Softer plastic
Less bounce,
more control

Lighter weight
Easier on
paddles

Quieter play
Less noise
indoors

Designed for
consistent
indoor temps

Best for:

- School gyms
- Recreation centers
- Indoor pickleball facilities

OUTDOOR BALLS

Best for: Outdoor courts

Harder plastic
More bounce,
built for speed

Heavier weight
Handles wind
better

More durable
Built to last on
rough surfaces

Withstands
heat, cold, and
sun exposure

Best for:

- Outdoor courts
- Windy conditions
- All-weather play

BALL COLOR OPTIONS

High visibility for better tracking!

NEON YELLOW
Most popular.
Excellent visibility
day or night.

NEON GREEN
Great contrast
on most court
surfaces.

ORANGE
Easy to see in
dull light & shade.

PINK
Fun look with
high visibility.

WHITE
Traditional look.
Best in bright
sunny conditions.

BALL COMPARISON GUIDE

FEATURE	INDOOR BALLS	OUTDOOR BALLS
BOUNCE	Lower bounce More control	Higher bounce More speed
WEIGHT	Lighter (~0.78 – 0.84 oz)	Heavier (~0.88 – 0.94 oz)
HOLE SIZE	Smaller holes	Larger holes
DURABILITY	Good for indoor surfaces	Built for outdoor conditions
WIND RESISTANCE	Not designed for wind	Handles wind much better
NOISE LEVEL	Quieter	Louder
BEST TEMPERATURE	60°F – 80°F (15°C – 27°C)	20°F – 110°F (-6°C – 43°C)

SPECIALTY BALLS

LOW BOUNCE BALLS

Best for: Beginners & drills
